

No More Dependency On The Flawed Heritage Banking System

“Reclaim financial freedom and extract new value from vast fintech digital innovations of the Borderless Mobile Wallet”

Lower Fees

Seamless Instant Payments

Borderless Mobile Transaction

BULLIONBLOCK, a highly secure state of the art money Wallet and Chat messenger solution, with chat features available on Whatsapp and Telegram combined.

The Wallet App enables seamless chat with other users which can handle millions of concurrent chat users and crossborder payments and settlement of financial transactions on-chain, making the current banking constraints and costs unnecessary and avoidable.

Our digital Wallet cashless experience is characterized by P2P real-time messenger and transactions, mobile payments, financial transfers, integrated billing and next-generation security.

The BULLIONBLOCK fintech solution is strategically designed as a bullion-backed financial preservation system to shield currency against market bubbles and global economic volatility, offering the user convenience, privacy and clutter-free frictionless transactions.

The digital borderless Wallet App provides a linked Contactless Payments Ring, and offers personal and business accounts with a linked Debit Card and QR Code to send or receive both crypto and fiat currencies.
